Taskivities

SAMPLE FILE

Your upload worked.

This is the Taskivities demo, so every file is stored as this one, under the name you gave it. On your own instance the real file is kept, and anyone who can see the task can open it.

Attachments live in your own Cloudflare R2 bucket. Images, PDFs and plain text open in the browser; everything else downloads. Up to 25 MB per file and 50 files per task.

Run your own: www.taskivities.com/open-source
